Jodhpurs and Breeches

Carefully take your inside leg and waist measurements. Remember that different styles of jodhpurs have slightly different proportions. Please note that when your jodhpurs arrive, they may appear shorter than the size ordered. This is perfectly normal as jodhpurs are made from stretch material. Please try on your jodhpurs to ensure their fit is correct.

Gloves-General sizing

A guide is that you should choose a size similar to your shoe size. You want a good snug fit but bear in mind the material the gloves are made of. Some gloves are not suited to getting wet and may become uncomfortable to wear. Ensure that you have chosen the correct gloves for the riding conditions that you intend to use them in.

What Size Horse Rug do I need?

When deciding on which size Horse rug to purchase measure an existing Horse rug that fits well, when possible. Lay it flat on the ground and measure from the front edge, along the side to the back edge. Alternatively, measure from the centre of the horses chest to a line vertical with the top of the tail.
